NetDirector and ADC Legal Systems announce strategic alliance to provide Perfect Practice Case Management System integration to the NetDirector Data Exchange

Tampa, FL — March 10, 2006 – NetDirector and ADC Legal Systems today announced the availability of Perfect Practice Case Management integration with the latest version of NetDirector's data exchange service for the Mortgage Banking Industry. Phase I integration currently allows Perfect Practice customers to send and receive Foreclosure Referrals and Standard Event Updates with VendorScape and Countrywide BPI. Continuing Phase I integration development will complete NewTrak and LenStar integration.

ADC is offering Perfect Practice customers a NetDirector connector module. This connector module offers a graphical data mapping utility with drag and drop functionality to ensure quick setup and connection to NetDirector. NetDirector then handles all routing, translation, and transformation of data between the Attorney and their Vendors/Trading Partners. This module will significantly reduce any custom programming upfront and will allow Attorneys to quickly and easily begin reaping the benefits of automated bi-directional transaction processing. Once on-line, customers have peace of mind with NetDirector's store and forward capability in case of service interruption. Plans are in place to offer additional NetDirector enabled transactions, such as Service of Process, Title Orders, Publication, and more.

"We are pleased to be able to provide our customers with a leading edge data exchange to automate the default transaction process," said Monty Helin, president at ADC Legal Systems. "By utilizing the NetDirector/Perfect Practice interface, our customers will realize numerous benefits including, but not limited to: reduction in administrative costs, mitigation of staffing capacity issues, optimized business processes, improved employee productivity, enhanced vendor communications, improved client satisfaction, etc. By partnering with NetDirector, we are able to speed time to market for new vendor interfaces and enable our development resources to focus on enhancing our world-class Case Management solution."

The first two Perfect Practice customers to go live with NetDirector were Feiwell & Hannoy, P.C., Indianapolis, IN, and Smith, Hiatt & Diaz, P.A., Ft. Lauderdale, FL. They chose NetDirector because their default servicing data would be transmitted electronically to and from one secure source versus communicating in a point-to-point fashion with all their different vendors. They also liked the fact that Perfect Practice provides the connector module to eliminate custom programming and that NetDirector handles the Vendor-side communication and issues management. This allows their IT staff to focus on their core business.

"ADC Legal Systems is an industry leader, and we are pleased to partner with them on their vision to improve vendor interfacing and reduce their customers' operational costs," said Harry Beisswenger, executive vice president at NetDirector. "This alliance with ADC and their Perfect Practice customers builds upon NetDirector's success in the Mortgage Banking industry. To have an industry standard data exchange and leading case management system on the same platform will create compelling opportunities in the future."

About ADC Legal Systems, Inc.

Perfect Practice® Foreclosure / Bankruptcy Case Management automates small to large law firms and in-house legal departments representing creditors and lenders. Founded in 1985, ADC Legal Systems, Inc. is among a small handful of software companies that can cite a 20-years history of successful operation, exclusively serving the legal community.
