NetDirector announces new customer signings

Tampa, FL — April 14, 2008 – NetDirector, provider of a leading edge data exchange for the mortgage banking industry, today announced new customer commitments for Q1 2008. NetDirector partners with its subscribers to provide a cost-effective solution that allows them to move data securely with a myriad of industry trading partners including a national attorney/trustee network, mortgage lenders, title providers, process servers, publications, and many more. NetDirector now processes over **1.5 million data and document transactions** per month.

"Data and document automation rank high as a strategic priority, as attorneys and their vendors seek to reduce manual processes and improve profit margins," said Harry Beisswenger, COO of NetDirector. "Our remarkable growth over the past year shows that firms nationwide are choosing NetDirector as their technology of choice for dealing with their number one challenge in transforming their business – process automation."

NetDirector is pleased to announce the following attorney/trustee firms that have recently joined their subscriber network: *Albertelli Law, P.L. (FL, GA & AL), Davidson Fink, L.L.P. (NY), Dean Morris, L.L.P. (LA), Doyle & Friedmeyer, P.C. (IN), Foreclosure Management Company (KS), Law Offices of Daniel C. Consuegra (FL), McCabe, Weisberg & Conway, P.C. (CT, DC, MD, NJ, NY, PA & VA), Partridge Snow & Hahn, L.L.P. (MA & RI), Pendergast & Jones, P.C. (GA), Scott Law Firm, P.A. (SC), Richard M. Squire & Associates, L.L.C. (PA), Smith & White, P.A. (FL), and Tiffany & Bosco, P.A. (AZ)*. New vendors signing with NetDirector recently include: *E.L. Johnson Investigations (Service of Process), RES.NET (REO Closings, Title, and Eviction), and MailObjects.com (Certified Mail)*. These companies see the advantage of trading data and documents with multiple client systems with one connection to a centralized data exchange instead of developing and maintaining individual data interfaces.

"We were looking to form a long-term relationship with a technology partner to manage our data and document interfaces. We believe that's the kind of relationship we'll have with NetDirector," said Mark Bosco, assistant managing partner of Tiffany & Bosco, P.A. "Our firm was also impressed with NetDirector's depth and breadth of available data trading partners and different types of data and document interfaces - all accessible with one internet connection. By speaking with a number of current clients, we also validated their reputation for providing a highly reliable service backed by responsive support."

"While data interface adoption is clearly on the rise, so too is the demand for technology that has the flexibility to adapt to a rapidly changing environment," added Beisswenger. "As we move forward, our mission is to continue to build on our innovative architecture, making our customers successful and expanding on our leadership position in the mortgage banking market."

About NetDirector, LLC

NetDirector provides an on-demand data exchange service for the Mortgage Banking Industry to improve business process efficiency and standards compliance. NetDirector was created to enable the integration of vital business information and processes between attorneys and trading partners. NetDirector uses an industry-centric approach leveraging expertise and state-of-the-art technology to address these integration needs. NetDirector creates value for organizations of any size by providing speed in transaction processing, reducing partner collaboration costs and enabling greater responsiveness in serving customers. NetDirector is an associate member of the United States Foreclosure Network (USFN) and the American Legal & Financial Network (AFN).
