NetDirector announces availability of eMason Clarifire Interface

Tampa, FL — September 20, 2006 – NetDirector, provider of the leading Data Exchange for the Mortgage Banking Industry, today announced the general availability of a new interface with the Clarifire process management system from eMason, Inc. NetDirector provides a cost-effective solution to automate transactions from a myriad of Vendor Systems including: VendorScape, NewTrak, Countrywide, Freddie Mac, Quandis, Process Servers, Title Products, Publications, and a large Attorney Network. The Clarifire process platform from eMason is utilized by Mortgage Loan Servicers to manage all their business processes, such as, loss mitigation, foreclosures, bankruptcies, acquisitions, REO, property preservation, title, litigation, contract management and more.

Clarifire Interface

eMason has developed a NetDirector Connector module for its Clarifire Process Management Application. This connector (web service) will significantly reduce any custom programming upfront and will allow Servicers to quickly and easily begin reaping the benefits of automated bi-directional transaction processing with their trading partners.

By utilizing web services communication protocol and XML data formats, Mortgage Loan Servicers using Clarifire can trade foreclosure and bankruptcy data real-time with NetDirector's Subscriber Network including Attorneys, Title Companies, Process Servers, Publication Companies, etc. NetDirector acts as a centralized, vendor neutral Data Exchange that translates and routes the mortgage loan data to the appropriate attorney case management system. The initial transaction set includes: Foreclosure/Bankruptcy Referrals from Servicer to Attorney and Standard event/Milestone updates from Attorney to Servicer without human intervention. Once on-line, Servicers and their trading partners have peace of mind with NetDirector's store and forward capability in case of service interruption.

"We are excited about our partnership with eMason to provide our mutual customers with "out of the box" data interfacing which will significantly reduce their operational costs and increase resource capacity" said Harry Beisswenger, executive vice president at NetDirector." Our alliance with eMason and their Clarifire customers builds upon NetDirector's success in the Mortgage Banking industry. To have an industry standard data exchange and leading default management system on the same platform will create compelling opportunities in the future."

"Adding connectivity to NetDirector aligns with our strategy, said eMason president, Jane Mason...we provide the ability to clarify your business processes and enhance access to data without using programmers. Process automation is no longer siloed within departments or modules, Clarifire, coupled with NetDirector, adds more power to Servicers that want to take back control of their operations."

About eMason, Inc.

eMason, based in Clearwater FL, is a software provider specializing in web based process automation for any industry. Our technology generates a competitive advantage by providing knowledge sharing, supply chain collaboration, and real-time process improvement and management. Companies the world over face a common dilemma - how to keep business process costs low while increasing the value of their client services and meet the needs of a dynamic marketplace. With advances in software and Web technology, the promise of automated business process management without the need for programmers, has become a reality with eMason.
