NetDirector announces availability of Title Interface and New Customer Signings

Tampa, FL — November 28, 2006 – NetDirector, the market and technology leader in on-demand data interface services for the Mortgage Banking Industry, today announced the availability of a Title Search Interface. This new interface allows Default Attorneys to automate their title search process. Two industry leading title search providers have already signed on and are ready to trade title searches with their clients. InfoTrack Information Services (www.infotrackinc.com) and Red Vision Systems (www.redvision.com) both found it beneficial to connect to NetDirector to provide bi-directional data to both Attorneys and their other Trading Partners on the network.

NetDirector provides a cost-effective hosted solution that enables Default Attorneys of any size or technical sophistication to securely share vital business information across their Trading Partner Network, including but not limited to VendorScape, NewTrak, Countrywide, LenStar, Freddie Mac, Quandis, LexisNexis, Title Providers, Process Servers, Publications and more.

Title Interface

The NetDirector Title Search interface allows Attorneys to request and retrieve Title Reports without leaving their case management system. This automated process will significantly reduce the need for re-keying of data into the Title Provider web-sites for requests and eliminate double keying data into the client's case management system. This automated approach will provide an estimated 15 minute per search labor savings while improving data accuracy. NetDirector provides a competitive advantage for Title Providers by drastically reducing their customer interface costs and systems overhead by communicating with one central Data Exchange.

"Based on customer and industry demand, we are pleased to add this new interface to our current product set", said Harry Beisswenger, executive vice president at NetDirector. "The network addition of these industry leading Title Providers and the Title Request Interface are just another example of how quickly NetDirector can react to our customer needs. Our centralized Hub architecture lends itself to quick deployment of new trading partners and transaction types. Subscribers only need to map once to a standard transaction dictionary allowing them to automate data trading with multiple trading partners - drastically reducing the cost of interfacing."

New Customers

NetDirector is pleased to announce the following new attorney customers that have recently joined their growing subscriber network: The Law Firm of Hutchens, Senter & Britton (NC), Potestivo & Associates (MI), Weltman, Weinberg & Reis (IL, IN, KY, NJ, OH, PA), Wilford & Geske (MN), Pite Duncan (AZ, CA, HI, ID, OR, NV, TX, UT, WA), Nielson & Sherry (KY), Hellerstein & Shore (CO), and Nicholas Barrett & Associates (RI). These firms chose NetDirector in order to outsource their interface automation and vendor support while allowing them to control their own destiny. These leading firms understand the advantage of subscribing to an on-demand service - not managing a technology platform - which allows them to focus on their core business.

About InfoTrack Information Services, Inc.

Based in Chicago, IL and established in 1990, INFOTRACK INFORMATION SERVICES, INC. is a full service title abstracting company. INFOTRACK specializes in meeting the demands of today's real estate market. INFOTRACK's extensively trained staff offers the expertise to tailor products to meet your specific title abstracting needs in a timely and accurate manner. With INFOTRACK you can eliminate the re-keying of title search information and re-direct your trained resources to be more productive and profitable. For additional information, visit our web site at: www.infotrackinc.com or contact our customer service, available 7:00 am to 8:00 pm CST, at: 800-275-5594 x 107.

About Red Vision Systems

Red Vision is the largest independent provider of title plant services in Florida and is rapidly growing plants in other parts of the country including California, Maryland, and Texas. Red Vision's patent pending title search platform, TitleVision, electronically posts courthouse, tax, and appraiser records to a company hosted "smart" plant. Used by lenders, title companies, and law firms who want to do their own in-house title searching, TitleVision minimizes the manual effort required to abstract and examine title, allowing users to greatly boost productivity, reduce turn times, and lower operating costs. TitleVision is also the basis of an abstract service offered by Red Vision out of its Gainesville, Florida service center, where searches are turned around in 50% less time than the industry average. For more information, contact us at 352-331-8242 or visit our web site at www.redvision.com.

About NetDirector, LLC

NetDirector provides an on-demand data exchange service for the Mortgage Banking Industry to improve business process efficiency and standards compliance. NetDirector was created to enable the integration of vital business information and processes between attorneys and trading partners. NetDirector uses an industry-centric approach leveraging expertise and state-of-the-art technology to address these integration needs. NetDirector creates value for organizations of any size by providing speed in transaction processing, reducing partner collaboration costs and enabling greater responsiveness in serving customers. NetDirector is an associate member of the United States Foreclosure Network (USFN) and the American Legal & Financial Network (AFN).
